-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a first action on the merits of application Serial No. 10/773,172, filed February 9, 2004.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file:

Information Disclosure Statement

Receipt is acknowledged of the Information Disclosure Statement filed February 9, 2004. The cited documents have been considered.

Specification

The disclosure is objected to because of the following informalities: In line 2 of page 8, "rubricating" should be – lubricating --.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear in claim 1 whether the expression "which is positioned while contacting" is intended to define structure or recite a method of assembly. The language of the last line of claim 1, "where the friction member is provided are formed", is awkward and should be reworded. The claims define "a spline-coupled portion" and "a portion of the spline-coupled portion". It is unclear which portion is referred to by "the portion" (line 7 of claim 2) or "the other portion" (line 8 of claim 2).

Allowable Subject Matter

Claims 1-12 would appear to be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Savoyard et al.(095) shows clearances in spline teeth for lubricant flow. Miura et al.('177) is cited to show projections 37 in oil infeed plate 32. Shikata et al.('514) teaches removing a spline tooth (57a) for improved oil flow. Yamaguchi et al.(JP 2-278043) provides clearance in spline teeth for oil flow. Matsuoka et al.('929) is cited to show passage 77a for lubricant flow to friction elements 51. Mohan et al.('644) shows passage 70 for lubricant flow. Lauscher('767) shows recesses 22 for improved lubricant flow.
